«Ультразвуковая дефектоскопия металлов
и перспективных материалов»

УЗДМ-2019

Ультразвуковой контроль от А до Я
(Памяти Анатолия Константиновича Гурвича)

Dear Colleagues!

We invite you to take part in the XXIII Petersburg Scientific and Technical Conference
"Ultrasonic flaw detection of metals and advanced materials" UTM-2019
(May 28 - 31, 2019, St. Petersburg, Repino)

Organizers of UTM-2019

Scientific Research Institute
of Bridges and
Nondestructive Testing

Emperor Alexander I St. Petersburg
State Transport University

supported by:

The nondestructive testing section
of the Scientific Council on Condensed Matter Physics
of the Russian Academy of Sciences

Russian Society for Nondestructive
Testing and Technical Diagnostics

National Welding Inspection
Agency

Associations of manufacturers of
railway equipment

Conference topics

includes plenary, sectional and poster sessions, presentations of new equipment and discussions on the following areas of theory, methodology and practice of ultrasonic testing (UT):

- Development of the methodological base of ultrasonic testing of metals, including additive manufacturing and other advanced materials (session I)
- Opportunities and features of innovative transducers, devices, and digital methods for processing and presenting UT data (session II)
- Ultrasonic technologies for inspecting, diagnostics, monitoring, and resource assessment of critical energy facilities, pipelines, and railway transport (session III)
- Metrology of modern facilities and technologies for UT (session IV)
- Standardization and normative regulations for UT (session V)
- Training and certification of personnel qualification in UT (session VI)
